

Practitioner-generated evidence

includes information or data generated through daily practice

In ECEC, practitioner-generated evidence usually includes observations of children's learning and development.

In schools, practitioner-generated evidence includes informal teacher observations, information from student assessments or feedback, and whole-school data.

Research evidence

is academic research that is usually published as books, reports, articles, summaries or podcasts

1,358 survey responses

Schools

consulting academic research to increase the knowledge of effective practice

consulting academic research to increase the knowledge of effective practice

consulting summaries of effective practices when making decisions

Confidence in gathering evidence

58%

lack confidence determining if the evidence is **rigorous**

46%

lack confidence determining if the evidence is **credible** and **relevant**

41%

lack confidence determining if the evidence is **rigorous** and if it's **credible**
